## DETAILED ACTION

### *Status Of Claims*

1. In the response filed 8/12/2008, claims 15-28 stands and are therefore currently pending in the application.

### *Allowable Subject Matter*

2. The following is an examiner's statement of reasons for allowance: Prior art fails to show a method of operating a tracking device operatively connected to a container and having at a remote communication device comprising the steps of performing a positioning information obtaining procedure concerning said container; sensing whether said tracking device is in proximity to an aircraft by detecting electromagnetic fields emitted by the aircraft; disabling the emission of the radio frequency signals from the remote communication device if proximity to the aircraft is indicated in said step of sensing and re-enabling emission of radio frequency signals from the remote communication device **only** if a lack of electromagnetic fields emitted by the aircraft is established **simultaneously** as a positioning information obtaining procedure is successfully performed. Prior art, such as Forster does not disclose re-enabling emission of radio frequency signals from the remote communication device **only** if a lack of electromagnetic fields emitted by the aircraft is established **simultaneously** as a positioning information obtaining procedure is successfully performed. Rather, Forster

Art Unit: 2612

teaches an exclusive OR type system wherein the system reactivates the signals based on location or proximity.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***
